

KAMADUR

INDUSTRIAL KNIVES

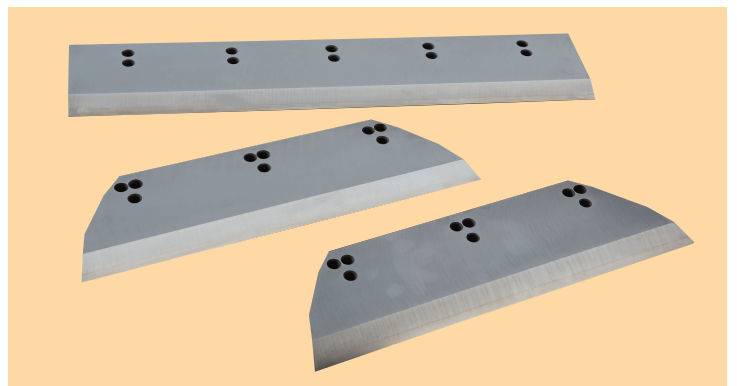

Total Graphic Solutions

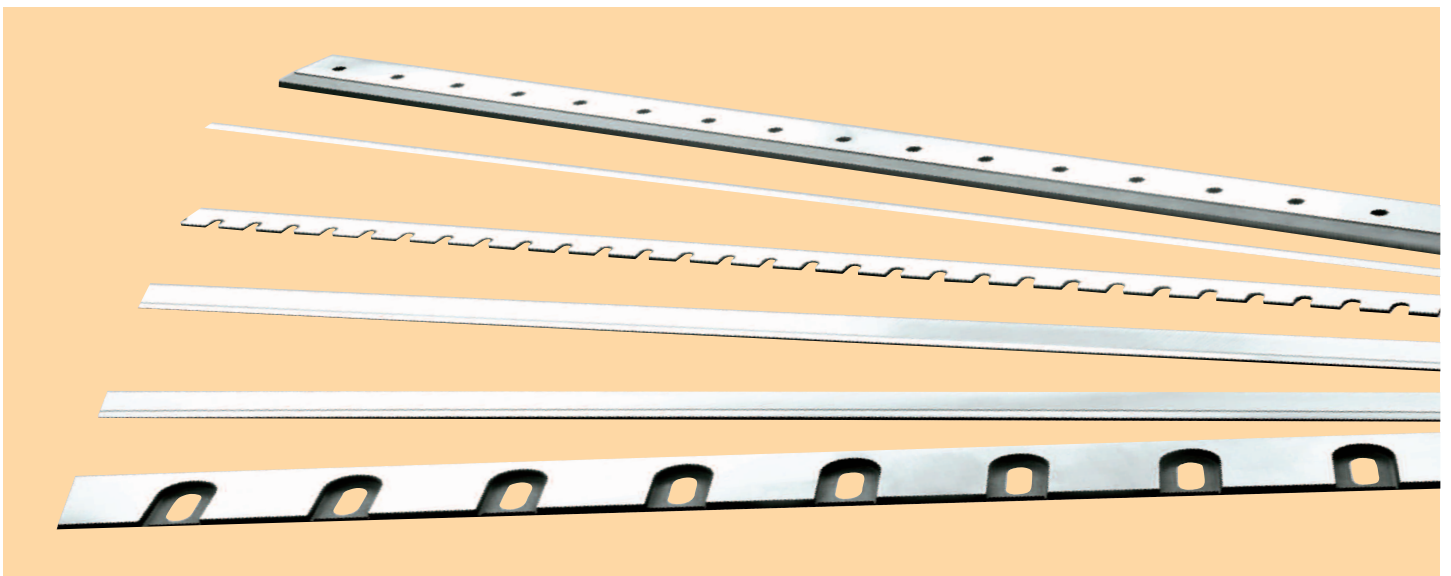

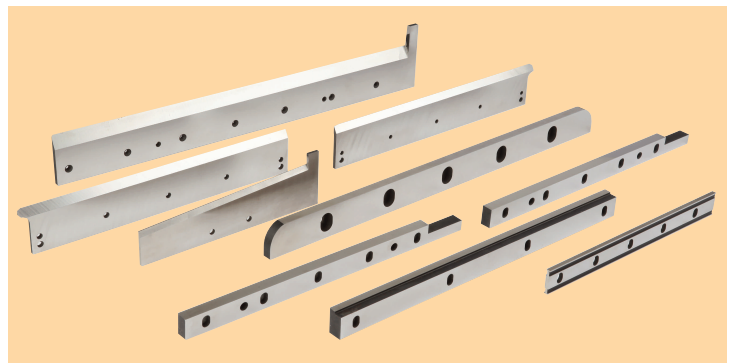

KAMADUR industrial knives supplies a wide range of paper cutting knives in all qualities: Steel, HSS, TC, LongLife (fine grain TC) and Genesis (ultra fine grain TC).

- Guillotine Knives
- Three Trimmer Knives
- Binding and Stitching Knives

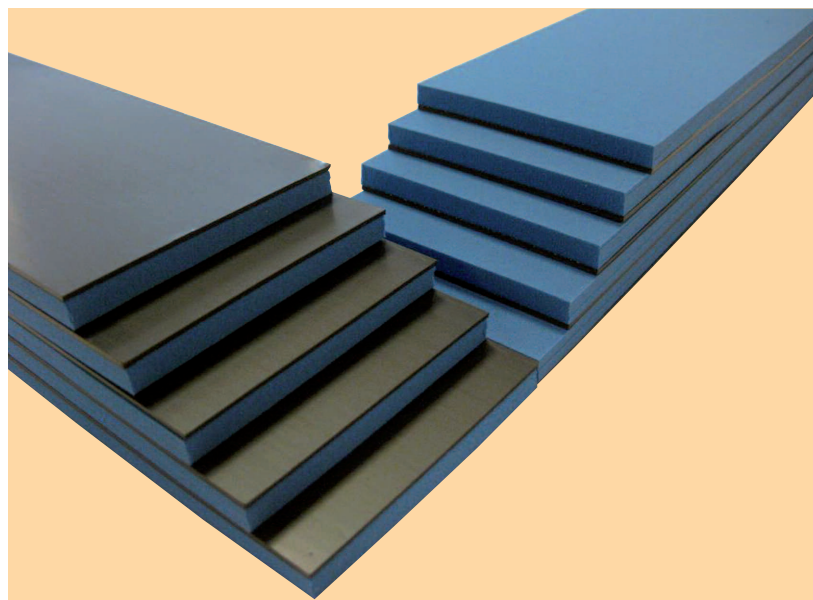

Sheeters

Sheeter knives up to 4.500 mm for high speed and heavy duty operations, available in toolsteel, high speed steel (HSS), powdersteel (PM) and Tungsten Carbide (TC) inlay.

Jiggerblocks

In nylon for longlasting performance with exchangeable wearstrip.

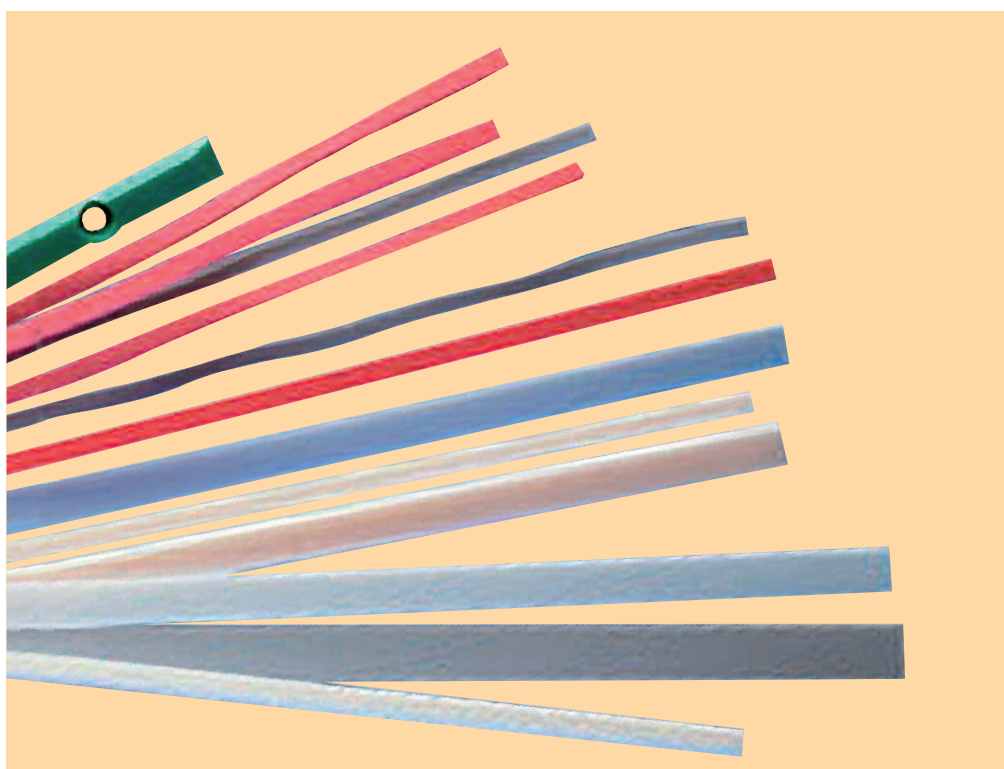

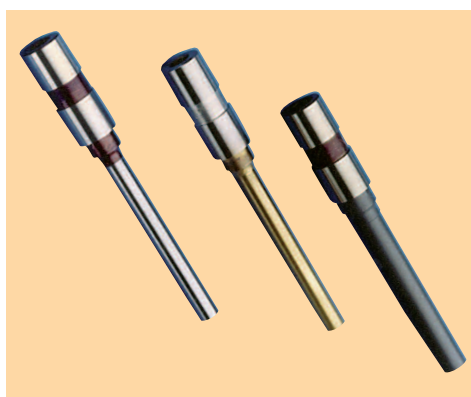

Magnetic Foam Pads

To distribute the pressure from the press clamp when cutting delicate and self copying paper.

Paperdrills

All mayor brand paperdrills in standard and long length in HSS or coated (Teflon, Titanium). Kamadur also supplies the NEW longlasting paperdrill with Tungsten Carbide coating: FUTURA.

Cutting-sticks

High quality cutting-sticks in Red for Steel knives, Grey for HSS and TC knives and Nylon for 3-knife trimmers.

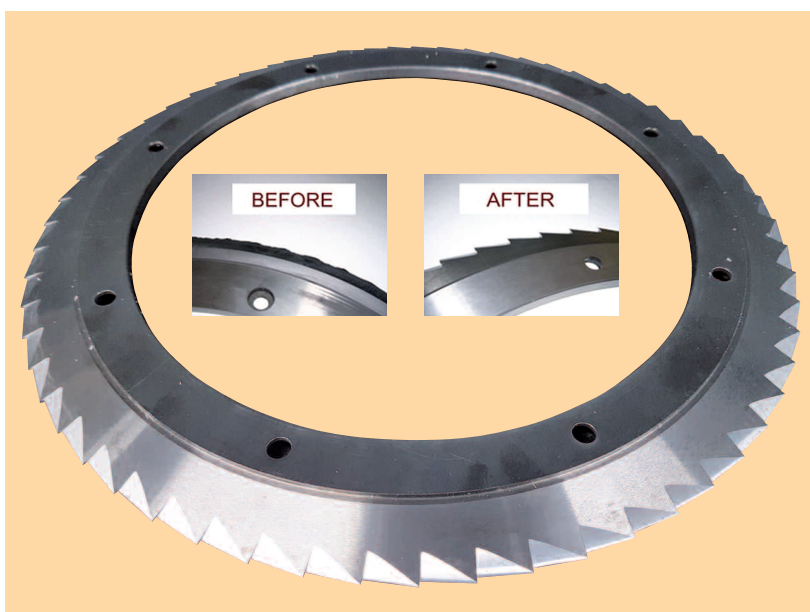

Most popular sizes available ex stock. Printing on sticks possible for extra marketing opportunities.

Folding Knives

We supply folding knives for all mayor brands of folding machines. Cutting, creasing and perforation in springsteel or HSS. Bottomknives and creasing units provided.

Rotary Cutting

KAMADUR industrial knives supplies cutting tools for all well known rotary trimming and book spine milling machines. Our product range includes Millingteeth in TC as well as solid circular trimmers and bottomknives. Sharpening service offered through our European Service Center.
